

## News from Brocklesby Limited

**Brocklesby Limited** are leading experts in **fats, oils, grease, fatty sludge re-cycling and recovery.**

Our **Anaerobic Digester, Brocklesby Biogas**, is now fully operational and we are able to re-cycle bulk food waste. We are also delighted to advise you our factory is now running on recovered energy from the digester. Our carbon saving against standard fossil fuel is in excess of 84%.

We are increasing our production of renewable fuel, please enquire about RE360 for CHP and start your carbon and cost reduction.

We also supply recovery equipment for both food and oils and fats and sludges.

**For a free consultation please contact the office on: 01430 424900**
